Govt of H H the Maharaja of Mysore.

To

The First Assistant to the Hon'ble
the Resident in Mysore, Bangalore

Sir,

With reference to your letters No 3039 and 4899 dated the 21st May and 15th August respectively inquiring whether any educational institutions in Mysore are in possession of any apparatus for wireless telegraphy and if so whether there is any objection to requiring the surrender of such apparatus to the Director General of Posts and Telegraphs as has been done in the case of Educational Institutions in Britsih India, I am directed to state that there is no regular installation of Radio telegraphic apparatus in any Educational Institutions in the State The Central College, Bangalore, however, possesses one or two home-made coherers which are occasionally used in the Physics Department in laboratory experiments on Hertzian waves, but there is nothing in the way of long ~~way~~ wave transmitters capable of interfering with the working of long distance installations in the neighbourhood The Durbar are inclined to consider that these appliances, which are of a purely educational character and are used solely for educational purposes in the State Colleges, may well be left unaffected by any rules that may be framed and that their surrender need not be

believe that the surrender of the small appliances described above will not be required, in view of the explanation contained in para 2 of your letter of the 15th Instant that there is no intention to deprive Colleges of small models which can be of little practical utility
